PROFESSIONAL SUMMARY

Computer Science Engineering student and aspiring software engineer with hands-on experience building full-stack web applications, AI-powered platforms, ERP systems, and real-world software products. Experienced with React, Node.js, Express.js, MongoDB, PostgreSQL, Python, FastAPI, NestJS, and AI APIs. Focused on problem solving, hackathons, scalable product development, and continuous learning in software engineering and AI.

TECHNICAL SKILLS

Programming: C++, Java, Python, JavaScript
Frontend: HTML, CSS, JavaScript, React.js, Vite
Backend: Node.js, Express.js, FastAPI, NestJS, REST APIs
Databases: MongoDB, MongoDB Atlas, PostgreSQL, Prisma
AI / ML: Machine Learning, Generative AI, Google Gemini, Computer Vision, PyTorch, MobileNetV2
Tools / Cloud: Git, GitHub, Postman, VS Code, Docker, Vercel, Netlify, Render, Cloudinary
Core Concepts: DSA, OOP, DBMS, API Development, Authentication & Authorization, System Design

EDUCATION

Bachelor of Technology — Computer Science & Engineering

CHARUSAT University / CSPIT · Gujarat, India · 2026–2029
Relevant Coursework: Data Structures & Algorithms · OOP · DBMS · Computer Networks · Web Development · Discrete Mathematics · Software Engineering

SELECTED PROJECTS

TrialGuard AI

AI-Powered Clinical Trial Risk Monitor & Protocol Deviation Detector

- Developed an AI-focused platform for identifying potential clinical-trial risks and protocol deviations.
- Built the backend architecture with Python and FastAPI for the IBM BoB AI Innovation Hackathon 2026.
- Prepared technical documentation, presentation, README, and submission artifacts.

Tech: Python · FastAPI · AI/ML

KrishiSeva

AI-Powered Smart Farming Advisory Platform

- Developed a multilingual agriculture platform with localized soil, crop, weather, and advisory workflows.
- Implemented pest and disease detection using MobileNetV2 and PyTorch; integrated Google Gemini for AI assistance.
- Built district-wise agricultural data covering 33 Gujarat districts and 25 crops.

Tech: Node.js · Express.js · MongoDB · JavaScript · PyTorch · MobileNetV2 · Gemini

Hospital ERP & AI Medical Report Analysis System

Enterprise Hospital Management Platform

- Designed modular workflows for users, appointments, medical records, prescriptions, laboratory, billing, and IPD.
- Implemented backend architecture with NestJS, PostgreSQL, and Prisma; designed Redis and BullMQ background processing.

Tech: NestJS · PostgreSQL · Prisma · Redis · BullMQ

Dakshkumar School Management System

Multi-Role School ERP

- Designed Admin, Teacher, Student, and Parent workflows with fees, hostel, activity tracking, and role-based access.
- Built the architecture around React, Node.js, Express.js, MongoDB, JWT authentication, and Cloudinary.

Tech: React · Vite · Node.js · Express.js · MongoDB · JWT · Cloudinary

KshetraPal

Agricultural Product & Crop Solutions Platform · Swayur Agrotech LLP

- Designed a premium responsive digital experience for products, crop solutions, FAQ, contact, and dealer inquiries.

Tech: HTML · CSS · JavaScript

HACKATHONS & LEADERSHIP

Smart India Hackathon 2026 — Team Leader

Selected through the institute-level process; led problem identification, project planning, and solution development.

IBM BoB AI Innovation Hackathon 2026 — TrialGuard Squad Lead

Led development of TrialGuard AI and contributed to backend architecture, AI integration, documentation, and presentation.

CURRENT LEARNING

Computer Science: DSA · OOP · DBMS · Computer Networks · Operating Systems Full-Stack: React · Node.js · APIs · Databases · Authentication

AI / ML: Machine Learning · Generative AI · LLMs · Computer Vision Engineering: System Design · Docker · Cloud

Product: Product Development · SaaS · Problem Solving · Startup Fundamentals

Portfolio: dakshsoni.vercel.app · GitHub: github.com/25csdaksh · LinkedIn: [LinkedIn](#)
